

MC QUILLAN GROUP QUALITY POLICY STATEMENT

John Mc Quillan
(Contracts) Ltd

Mc Quillan Envirocare Ltd

McQuillan Skip Hire Ltd

Edentrillick Quarries Ltd
Budore Quarries

John McQuillan (Contracts) Ltd are a civil engineering and highway maintenance contractor, with the scope of works encompassing demolition, bulk earthworks, drainage, road construction and maintenance of existing roads, hard and soft landscaping, environmental improvements and ancillary building works.

Edentrillick Quarries Ltd, quarries gritstone (at Edentrillick) for use in asphalt and bituminous macadam products and basalt (at Budore) for the general construction market.

McQuillan Skip Hire Ltd provides a dry non hazardous waste management, waste collection and disposal service.

McQuillan Envirocare Ltd was established to provide industry with Hazardous Waste Management Services.

The McQuillan Group is committed to supplying our customers with a timely and efficient service, which fully conforms to their agreed requirements.

To achieve this objective the Company have developed and documented an integrated management system. In order to ensure continual improvement of the service provided by the above companies, the quality elements of the system are commensurate with the requirements of ISO 9001:2000.

Ultimate responsibility for the effective operation of the Management System lies with the Relevant Company Director.

They have delegated the responsibility for identifying and evaluating quality problems and for initiating, recommending and providing solutions to the Systems Coordinator. All personnel must work to procedures appropriate to their role.

It is our belief that adherence to BS EN ISO 9001 enables the Company to function in a much more efficient manner, with confidence that the service delivered reaches the high standards which the Company seeks to maintain.

All staff charged with managerial responsibility are required to ensure that: -

- Work carried out under their control complies with customer requirements.
- Staff are familiar with the requirements of the quality system relevant to their work, that they have access to all applicable procedures and that they have read and understood these instructions.
- Resources required to provide a service in a satisfactory manner are available, with forward planning enabling future anticipated requirements to be prepared for.

The companies have established a system of monitoring, analysing and improve both the effectiveness of the quality management system and the activities of the organisation as a whole through a series of objectives and management programmes.

These objectives shall be reviewed annually at the management review meeting to ensure continuing suitability.
